

**CUBAN FROZEN CONCENTRATED GRAPEFRUIT JUICE (F.C.G.J.) STANDARD**

**Produced according to A.I.J.N. Code of Practice by a member of SGF**

**\* DESCRIPTION**

The CONCENTRATED GRAPEFRUIT JUICE is a pure and natural product, without additives or preservatives.

Produced by evaporating the water from the juices freshly extracted from grapefruits (White Marsh or Ruby Red). Seeds and excessive pulp are removed prior to concentration. It is produced in accordance with the A.I.J.N. Code of Practice. The concentrate is made from sound and ripe fruits harvested from NOT genetically manipulated plants and NOT treated with hormones.

**\* USAGE**

To obtain reconstituted single strength grapefruit juice, we recommend to dilute one (1) liter of concentrate with approximately 5,2 liters of flavourless drinking water.

**\* PACKAGING**

Cuban Frozen Concentrated Grapefruit Juice is packed in open head 55 US Gallon steel drums and/or in wooden/carton bins, with minimum two (2) polyliner inner bags:

- Net. Weight per drum – minimum 250 kg, maximum 260 kg
- Net. Weight per bin – minimum 1.200 kg, maximum 1.300 kg
- Shelf life – two (2) years, if stored at –18° Celsius.

**\* TYPICAL SPECIFICATIONS**

- Brix (corrected)..... 58° +/- 0,5° corrected
- Ratio (preferably delivered) ..... 05,00 till 10,99
- Colour score..... Typical of the fruit
